

BOOK ORDER

1. Raw material, plant nutrition and harvest issues... 9

1.1 Raw material, fruit... 9

1.1.1 Raw material, fruit... 9

1.1.2 Propagation... 9

1.1.3 Plant nutrition and fertilisation... 9

1.1.4 Development of flowers and fruit... 9

1.1.5 Harvesting issues... 10

1.2 Quality characteristics of raw material... 10

1.2.1 Correct degree of ripeness... 11

1.2.2 Freshness... 11

1.2.3 Cleanliness... 11

1.2.4 Health... 11

1.3 Constituents elements of raw fruit material and their technological significance... 13

1.3.1 Water... 13

1.3.2 Carbohydrates... 13

1.3.3 Fruit acids... 14

1.3.4 Vitamins... 14

1.3.5 Proteins... 14

1.3.6 Enzymes... 15

1.3.7 Aromatic elements... 15

1.3.8 Pigmentation and tannins... 16

1.3.9 Fats and wax... 16

1.3.10 Minerals and trace elements... 16

1.4 Apple cultivars... 16

2. Juice extraction technology... 18

2.1 Fruit reception... 18

2.1.1 Washing the fruit... 18

2.1.2 Sorting... 19

2.1.3 NFC-juice... 20

2.2 Maceration... 22

2.2.1 Grinding mill... 22

2.2.2 Centrifugal grinder... 22

2.2.3 Hammer mill... 23

2.2.4 Disc grating mill... 24

2.2.5 Displacement pumps... 25

2.2.6 Monopump... 25

2.2.7 Rotary piston pumps... 25

2.2.8 Screw spindle pump... 25

2.2.9 Mass/Sire pump... 25

2.3 Juice extraction... 27

2.3.1 Belt presses... 27

2.3.2 Horizontal presses... 27

2.4 Mash enzymes... 32

2.4.1 Structure of a plant cell wall... 32

2.4.2 Maceration... 35

2.4.3 Total liquefaction... 34

2.4.4 Pomace liquefaction... 34

2.5 Extraction by decanter... 38

2.6 Yield calculation for decanted apple juice... 38

2.6.1 Separators for the removal of coarse cloudy substances and the fining of apple juice... 39

2.6.2 Separators for the removal of coarse cloudy substances and the fining of apple juice... 39

3. Juice treatment... 40

3.1 Fining of fruit juices... 40

3.2 Fruit juice pasteurisation... 70

3.3 Filtration... 77

3.4 SHT heating storage... 77

4. Manufacture of apple juice concentrates 86

4.1 Fundamentals... 90

4.1.1 Evaporator engineering... 92

4.1.2 Evaporator efficiency... 92

4.2 Energy efficiency... 93

4.3 Finishing of concentrate... 94

4.4 Aroma recovery... 94

5. Yield calculation from various juice extraction methods... 97

6. Recycling of pomace and sludge... 98

6.1 Apple pomace as animal feed... 98

6.2 Apple pomace as input for pectin extraction... 98

6.3 Pomace drying... 99

6.4 Composting of pomace... 99

6.5 Pomace incineration... 99

6.6 Cloud sludge... 99

Index... 102

Bibliography... 104

Apple Juice Technology The Guide Book for Practitioners

1st Edition, 2018

Dipl.-Ing. Thomas Birus
ISBN 978-3-9808682-3-5
108 pages, DIN A 4,
paperback

EUR 70,-

(+ VAT, if applicable + P&P)

Herewith I order the above mentioned book:

Quantity _____

Invoicing/Delivery Address (*mandatory):

Name/Surname:* _____ Department/Position*: _____

Company:* _____

Street:* _____

ZIP Code/Town/Country:* _____

Direct Phone: _____ E-Mail: _____
