PACKAGING AUTOMATION

Unpacking the packaging industry: what’s driving innovation? 294

The packaging automation industry is in the midst of a transformation shift, driven by technological advancements and increasing consumer demands. Consumer spending accounts for 68 % of the US economy, and it is expected to increase by an average of 5 % per year through 2026. With rising consumer demand and labor-intensive processes in the packaging industry, automation leads the way. Today, the focus is on precision, speed, sustainability, and customisation, all made possible by cutting-edge automation technologies ...

PROCESS TECHNOLOGY

**Leybold develops vacuum solution for sustainable beer bottling
Oil-free vacuum reduces costs and ensures a high level of hygiene 298**

The classic glass beer bottle offers numerous advantages for producers and consumers compared to other types of containers. In addition to a fresh taste and protection from external contaminants, the bottle design communicates the brand image and contributes to the enjoyment of the beverage. With this in mind, it’s no coincidence that in Germany alone, there are currently several billion glass bottles from various breweries in circulation ...

LABELLING

**Markem-Imaje guarantees compliance with EU regulations for Bisol1542,
the historic Prosecco Superiore winery of the Lunelli Groups 302**

Markem-Imaje, the global provider of end-to-end supply chain solutions and industrial marking and coding systems, supported the Lunelli Group, a symbol of excellence in Italian beverage, in adapting to the stringent EU regulations on wine labelling. Within the Lunelli Group, the Bisol1542 and Jeio brands stand out, represented by the historic Bisol1542 winery, which boasts a centuries-old legacy that began in 1542 in the hills of Valdobbiadene, recognised as a World Heritage Site by UNESCO ...

Versatile learning options:

KHS Campus pools its training programme and includes even more digital options 308

KHS not only provides the beverage industry with future- proof lines and machines but also with an extensive programme of training courses tailored to customer requirements for the efficient maintenance and operation of components. The turnkey supplier has now pooled all of its training options under the KHS Campus label and supplemented this with a number of virtual study units. KHS customers can choose a suitable, authoritative training option for their machines with their order, for commissioning and during all phases of operation ...

EVENTS

Beverage industries in Germany and Europe constantly in investment mode 310

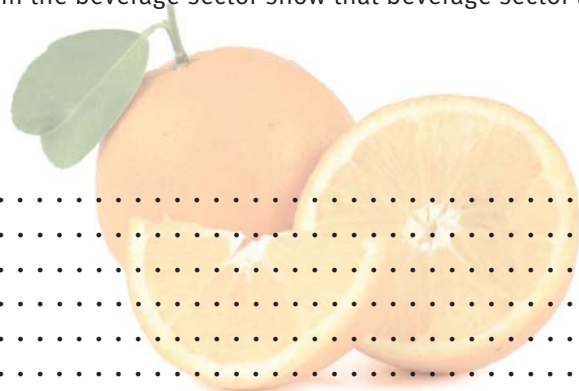

BrauBeviale 2024 is already a firm fixture in the exhibition calendars of all significant suppliers to the beer and beverage production and packaging market. From 26th to 28th November 2024 in Nuremberg, the industry will once again meet and exchange new impulses related to production operations. Market developments and changes in demand, as well as the considerable challenges facing the industry in the areas of resource security, packaging conception, energy saving and production efficiency will be the topics of the hour. The current

industry figures on the production of machines in the beverage sector show that beverage sector already consequently follow this pathways ...
