**interpack 2026:
developments in the packaging industry**

What makes FRUIT PROCESSING essential to your 2026 advertising strategy?

FRUIT PROCESSING is where industry professionals turn for insights, trends, and trusted information. By placing your brand in this environment, you gain more than just reach — you gain recognition, influence and impact.

Because visibility is not enough — credibility matters.

With **FRUIT PROCESSING**, you benefit from:

- Direct access to decision-makers and buyers in your industry
- A trusted editorial environment that enhances your message
- Multi-channel presence: print, digital, and special editions
- Tailored advertising solutions to match your campaign goals

In 2026, make your advertising count where it matters most.

EVENTS

Materials, packaging materials and packaging aids: the full variety for all applications at interpack 2026 78

“Innovative Materials” is one of the hot topics at interpack 2026 and the packaging materials area of the trade fair brings together the packaging industry’s concentrated expertise – with over 1,000 exhibitors and a globally unique variety of packaging solutions, packaging materials and packaging aids ...

PET BOTTLES

KHS SUPREME: clear benefits for aseptics 82

With KHS SUPREME, the KHS Group is taking the protection of oxygen-sensitive beverages up to the next level. The innovative system combines the benefits of glass with the handle-ability of PET by applying Plasmax barrier technology. KHS presents the result of an extensive development study: with the KHS SUPREME PET bottle, the Dortmund turnkey supplier is focusing on the product protection of oxygen-sensitive beverages such as tea ...

CARTON & PET

Tetra Pak extends paper-based barrier packaging to high-speed packaging lines in Asia 84

Tetra Pak has taken another step forwards in sustainable packaging by expanding its innovative paper based barrier technology to high speed Tetra Pak® A3/Speed filling lines, with Maeil Dairies becoming the first producer globally to implement the solution for its soy milk. This milestone aligns with a broader shift across the food and beverage industry, where producers are accelerating the transition towards low-carbon, renewable packaging materials ...

PASTEURISATION

Sidel introduces SWING® Evo: the pasteuriser that redefines efficiency through intelligent design 86

Sidel unveils SWING® Evo, its next-generation tunnel pasteuriser that combines smart modular design with a breakthrough counterflow concept, setting a new benchmark for sustainability and performance in beverage production. Drawing on decades of industry expertise, Sidel’s SWING® Evo introduces an innovative counterflow concept and modular design, allowing beverage manufacturers to precisely control pasteurisation ...

PRODUCT DEVELOPMENT

Roquette launches breakthrough clean-tasting pea protein isolate 88

Roquette, a global leader in plant-based ingredients, is expanding its NUTRALYS® portfolio with the launch of NUTRALYS® Pea 850F, a new pea protein isolate designed to unlock superior sensory performance in plant-based formulations ...

N-Zyme BioTec accelerates biotechnology innovation 90

N-Zyme BioTec, Döhler Group’s dedicated biotechnology platform, is accelerating the development and industrialisation of next-generation ingredients. As consumer expectations evolve toward cleaner labels, better nutrition, authentic taste and sustainable production, traditional ingredient approaches alone are no longer sufficient. Advanced biotechnology offers new pathways to transform nature into high-performing, scalable solutions ...

How to squeeze the most ROI out of your fresh juice programme 92

Freshness is no longer just a customer preference in the juice industry — it is an expectation. The global juice market now totals nearly \$165 billion and is expected to reach nearly \$230 billion by 2034. Driven in part by more health-conscious lifestyles, recent research confirms that 52 % of buyers are now prioritising “real” ingredients and reduced sugar claims and the traditional juice aisle is being outpaced by the demand for fresh-squeezed alternatives ...

SUSTAINABILITY

Sustainability – Recycling – Upcycling with centrifuges 94

Three words that the manufacturing industry should keep questioning. What does sustainable mean? To handle resources sustainably and responsibly and to adopt an ethical attitude, both economically and ecologically. It means the most long-term possible use of economic assets. One of these assets is centrifugal separation technology. Hardly any other unit is used as multifunctionally in the entire process industry ...

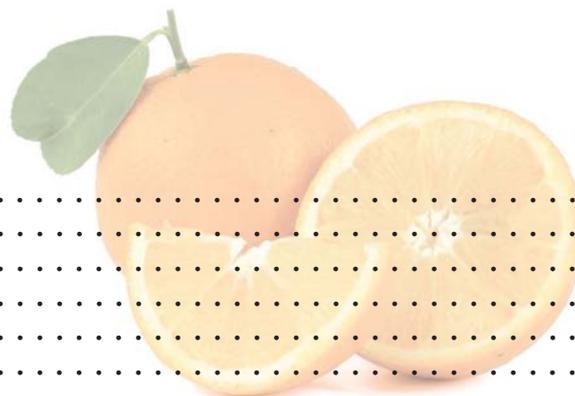

CAN MANUFACTURING

Henkel showcases smart digital equipment solutions and advanced material technologies 96

Henkel Adhesive Technologies will be presenting its latest solutions for efficient, safe, and sustainable metal packaging at METPACK 2026. Its focus will be on digital equipment and service concepts for greater line performance, new sealants for beverage and food cans, and technologies for resource-efficient surface treatment. At stand 1C38 in hall 1, Henkel will demonstrate how metal packaging manufacturers can reduce the CO₂ emissions from their production while maintaining high product quality and increasing throughput ...
